

WATA Knows... and you can too!

## Technical Skills Courses

### Air Conditioning Maintenance In company training

#### The WATA route to success

This workshop is designed to provide a practical solution to the maintenance of air conditioning systems. The aim of the workshop is to make delegates aware of the various components of the system, including refrigeration, and the required maintenance periods and checks that should be made to that system.

#### What does the course cover?

- Human comfort
- Types of systems available
- Use of system analysers(s), recovery units, vacuum pumps and cylinders
- Use of specialist tools
- Building up a maintenance system
- Cleaning ductwork
- Site Surveys

#### Who is the course suitable for?

The workshop is aimed at all levels of engineers who wish to gain practical and theoretical knowledge of refrigeration and air conditioning systems with regard to maintenance systems.
