

WATA Knows... and you can too!

Health and Safety Courses

Understanding Vibration: Hand Arm Vibration Risk Assessment & Management 1 & 2 day options

The WATA route to success

The aim of the course is to provide delegates with a clear understanding of the risks associated with hand-arm vibration syndrome of which vibration-induced white finger: VWF is the common manifestation. The techniques used to carry out assessment of potentially risky operations are clearly explained. It is aimed at safety advisors, managers, supervisors, purchasing and other engineers responsible for activities exposing operators to potential risks from hand-arm vibration.

On the second day of the course there is a practical assessment workshop and provides the additional training needed to acquire the necessary skills for competency in hand-arm vibration and risk assessment. Delegates will be awarded a WATA Certificate on successful completion of a practical and written assessment.

What does the course cover?

- Symptoms and diagnosis
- Assessment techniques
- Preventative measures
- Legal background
- Action plans
- Practical measurement workshop

PLEASE BRING A SCIENTIFIC CALCULATOR WITH YOU

Who is the course suitable for?
