Health and Safety Courses

Introduction to the Management of Occupational Road Risk – 1 Day

The WATA route to success

What does the course cover?

This is an introduction to key considerations in the management of occupational road risk. The course will explore a range of risk management tools, methods and sources of information on occupational road risk and their use within the workplace.

The course will more specifically cover the following topics:

- Benefits of managing occupational road risk
- Specific law relating to occupational road risk
- Occupational road risk factors
- Development of an occupational road risk policy
- Occupational road risk assessment
- Vehicle selection, maintenance and management
- Driver competence, managing driving distractions and fitness to drive
- Journey management
- Open forum discussion on road risk management issues

This course covers both the legislation and the practical aspects of road risk management.

Who is the course suitable for?

Health and safety professionals, human resources professionals and fleet managers.
