IOSH Manual Handling Operations Risk Assessment – 2 Days

The Manual Handling Operations Regulations require employers to assess and reduce the risk of injury from all manual handling operations. This two-day IOSH accredited course is designed to give Assessors the appropriate training in accordance with the Regulations, so as to be able to assess their employer's manual handling operations and to implement controls.

What does the course cover?

- Why do we need to know about the legal requirements relating to manual handling operations?
 - Who is affected?
 - How are they affected?
- What do we need to know about the legal requirements relating to manual handling operations?
- When and where do we need to apply the legal requirements relating to manual handling operations?
- How are the legal requirements relating to manual handling operations satisfied in a practical way in order to integrate with overall safety management?

Who is the course suitable for?

Delegates whose responsibilities include the management of the risks associated with manual handling operations and those who are able to be involved with the assessment of manual handling operations. Health and safety professions wishing to develop their skills further will benefit from attending the course.
