Permit to Work – 1 day

The WATA route to success

This 1 day course outlines the use of the permit system in managing a safe system of work. It examines common permit systems and their applications to different fields of work. The course explores some of the pitfalls using examples of when things have gone wrong and why.

The course includes examples of permit systems and policies in use across many sectors as well as questions to consider when auditing your current arrangements.

What does the course cover?

- The need to manage safe systems of work
- Application and functions of the permit
- Building a permit system
- Typical applications
- Basic permit concepts - isolation, handover, supervision, suspension, display
- Managing multiple permits
- Generic and specific permits
- Typical permit problems

Who is the course suitable for?

Directors, Managers, Supervisors, Safety Advisors, Clients, Engineers, Architects and other professionals including Contractors and Sub-Contractors.
